

# Eurosensor Capabilities

## POSITION

Both contacting & non contacting technologies including; Potentiometric, Magneto-Restrictive, Hall Effect, Encoder and LVDT/RVDT in various sensor packages.

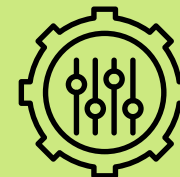

## BESPOKE SENSORS

From designing to manufacturing Variophm have the capability to provide full custom solutions to suit any application.

## CUSTOMISATION

In our manufacturing facility we are able to modify enhance and adapt sensors to custom specifications enabling us to provide competitive solutions.

## PRESSURE

Pressure Transducers and Pressure Switches. We also have PCB mountable pressure switches, hazardous area pressure sensors and combined pressure and temperature transducers

## LOAD & FORCE

Single point, shear & bending beam, 'S' type and compression load cells, plus clevis pins and torque sensors. Load cells are available in many sizes - some as small as a 1 cent coin.

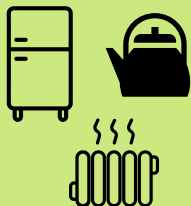

## INDUSTRIES

- ▶ Industrial
- ▶ Medical
- ▶ Transport
- ▶ Aerospace
- ▶ Defence
- ▶ Renewable Energy

## TEMPERATURE

Temperature probes, NTC thermistors, digital temperature sensors, RTDs, Infrared, thermocouples, high precision thermometers and combined pressure and temperature sensors.

## OTHER SENSORS

Flow and Level Switches  
Fluid Property Sensors  
Vibration Monitors  
Photo Optic Sensors  
Humidity Sensors  
And many more....

**AND MORE...**

**When precise measurement feedback is critical, Variophm's extensive portfolio of application specific sensors and transducers are designed to meet the requirements of even the most stringent applications**
